SUMMARY

Cloud & DevOps Engineer with hands-on experience delivering end-to-end cloud-native platforms across development, infrastructure, and deployment. Strong foundation in automation, Kubernetes, GitOps, CI/CD, observability, and AI-powered operations, building scalable, resilient, and production-ready solutions on AWS

PROJECTS

CapitalX – Enterprise Full-Stack Platform

- Engineered a production platform with complete ownership — spanning application development, cloud infrastructure and live operations
- Streamlined delivery via cloud-native automation — reducing manual effort by 90% and accelerating production deployments

Wanderlust – Cloud-Infrastructure • Production Systems

- Migrated a travel application to a production-ready cloud environment, enabling 10x faster infrastructure provisioning with containerization and AWS
- Enhanced production readiness with integrated observability, security, and resilient cloud operations for reliable application delivery

Online Shopping App – GitOps • Cloud-Native Delivery

- Architected a cloud-native GitOps platform with Argo CD, enabling automated, declarative, and version-controlled application delivery across Kubernetes environments
- Reduced manual deployment effort by 95% while enhancing deployment reliability through continuous synchronization and self-healing capabilities

AI-Powered Docker – Agentic AI • Workflow Automation

- Designed an AI-powered container operations platform by integrating LLM reasoning, workflow orchestration, and Docker automation into a unified operational system
- Executed 10+ production-style workflows with intelligent task orchestration, automated recovery, and live metrics—enhancing operational efficiency while minimizing manual intervention

EDUCATION

Bachelor of Computer Applications Vidhyadeep University

2024 - 2027 Surat, Gujrat

- Key Strengths
- Continuous Learning Mindset
- Commitment to Excellence

SKILLS

Kubernetes	Argo CD	
Jenkins CI/CD	Docker	Linux
Git & GitHub	Python	AWS Cloud
Terraform	Ansible	Prometheus
Grafana	Networking	
Shell Scripting		

KEY ACHIEVEMENTS

-  Built 4 Production-Grade DevOps, Cloud & AI Projects
-  Hands-on Experience with AWS, DevOps & GitOps
-  Delivered an End-to-End Full-Stack Enterprise Platform from Development to Production
